Magna Stainless Installs RBI Precision Blanking Line

By Metal Center News Staff on Sep 15, 2020

Magna Stainless, a St. Laurent, Quebec-based service center, has installed a Precision Blanking Line from Red Bud Industries, Red Bud, Ill. The new line is rated for stainless steel up to 0.135 inches and aluminum up to 0.190 inches at widths of 72 inches and coil widths up to 30,000 pounds.

The line consists of a coil stage and load system, uncoiler, peeler breaker, roller leveler, pop-up flatness table, PVC/paper applicator, thread system, grip feed, shear, drop stacker, automatic lowering stack table and end discharge rollouts.

Magna Stainless is a leading Canadian distributor of aluminum and stainless steel bar and flat-rolled products.
